{In Archive} NJ PCB Fish Advisories

Gary Buchanan to: Marian Olsen 02/01/2006 01:33 PM

Marian, attached is the memo on which the triggers for NJ's PCB advisories are based. We currently use the "range approach". The advisories list meal limits for both 10-4 and 10-5 lifetime cancer risk for the general population. This is currently under review and may be changed with the next version of the advisories, expected to be issued within the next month. Advisories for high-risk individuals (women of child-bearing age and children) are based on the more stringent of cancer or non-cancer risks.
